

# CERFA : Generating CERFAs

CERFAs are French government forms.

This extension automatically pre-fills the relevant CERFAs with the available data, makes it easy to fill in the other fields, and stores the generated pdf document in the relevant customer file.

## Features

This extension lets you create CERFAs pre-filled with customer information from an invoice. These CERFAs can then be modified, saved or printed.

Four documents are currently available:

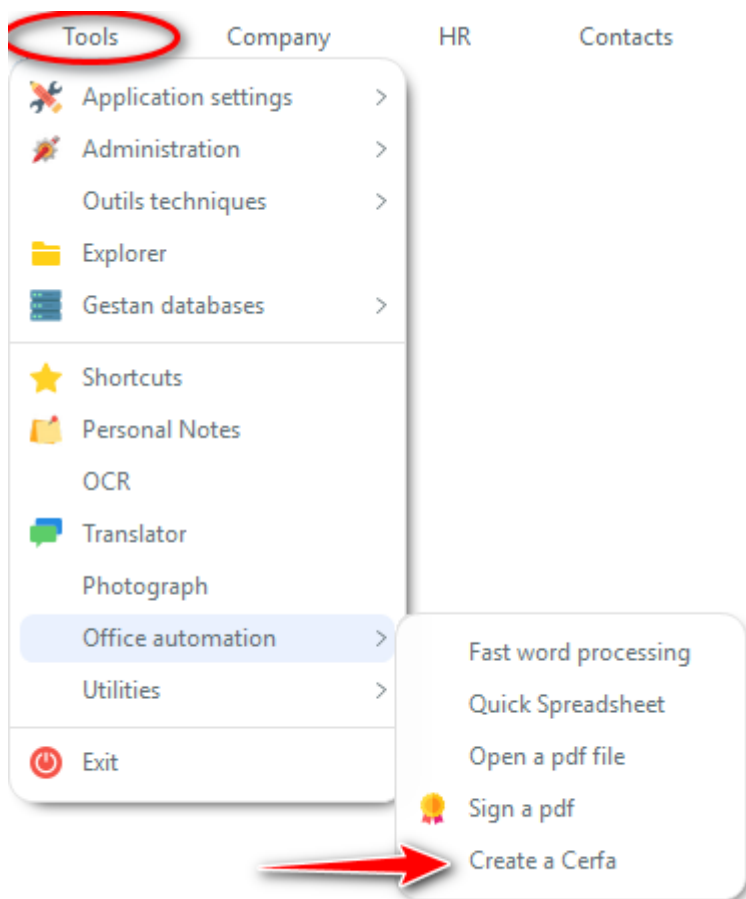

- the **CERFA n°13948 Attestation simplifiée** also known as **CERFA n°1301** (simplified certificate)
- **CERFA no. 13408**
- the **PV Réception Travaux** (Works Acceptance Report)
- the **reservations lifting form** for the Works Acceptance Report
- and **CERFA 15497**.

If you wish to include other CERFAs in the extension, please send your request to **dev@gestan.fr**.

## Installation

The extension is installed via the [extensions manager](#).

Once installed, the **Create a Cerfa** menu appears in Gestan's **Tools** menu.

With the ribbon menu, the menu is present in the **Office automation** button menu.

## Prerequisites

This extension works on Windows and Linux platforms, but not on Mac!

Before you can use it, you need to install the Java libraries, which you can find on [this page](#).

On the download page, choose the 64-bit “offline” versions for your particular platform, Windows or Linux. Below is the download page and the programs to download.

|  Windows  Which download should I choose?      |                                                |                              |                                                                                                      |

|                                                                                                                                   | Windows Online<br>filesize: 2.26 MB            | <a href="#">Instructions</a> | After installing Java, you may need to restart your browser in order to enable Java in your browser. |
|                                                                                                                                   | Windows Offline<br>filesize: 2.26 MB           | <a href="#">Instructions</a> |                                                                                                      |
|                                                                                                                                   | Windows Offline (64-bit)<br>filesize: 38.41 MB | <a href="#">Instructions</a> |                                                                                                      |
| If you use 32-bit and 64-bit browsers interchangeably, you will need to install both 32-bit and 64-bit Java in order to have the Java plug-in for both browsers. » <a href="#">FAQ about 64-bit Java for Windows</a> |                                                |                              |                                                                                                      |

|       |                                  |              |                                                                      |
|-------|----------------------------------|--------------|----------------------------------------------------------------------|
| Linux |                                  |              |                                                                      |
|       | Linux RPM filesize: 51.07 MB     | Instructions | After installing Java, you will need to enable Java in your browser. |
|       | Linux filesize: 48.03 MB         | Instructions |                                                                      |
|       | Linux x64 filesize: 45.04 MB     | Instructions |                                                                      |
|       | Linux x64 RPM filesize: 48.19 MB | Instructions |                                                                      |

If, despite installing Java, you get an error from the **JavaCharge** function, check your version of Microsoft Visual C++ Redistributable. If you have a version prior to 2015, you can download the latest version by following [ce link](#).

# Use

**Access :** *Tools → Office → Create a Cerfa*

The Combo 1 allows you to select the type of CERFA to be completed. Selecting the CERFA allows you to select the Gestan document concerned, usually a customer invoice. The screen then displays the CERFA in the field provided. The document can then be modified until the CERFA is saved or printed.

The resulting PDF document can be printed and saved locally using the buttons linked to the PDF. The 2 button is used to save the document in the customer's documents in Gestan. The CERFA will then appear in the list of linked documents.
