

ETIQUEXPED: Shipping labels * *

 **Fix Me!** Migration in progress

Overview

This extension is designed to print shipping labels, the kind you stick on all the boxes you drop off at the carrier.

You can print labels like this:

The QR code (optional) contains the following information:

- EXPED: [the sender's details]
- DEST: [the recipient's details]
- Parcel number: [the parcel number, for example 7/12]
- [the carrier name]
- [the shipment reference number]

Use

In Gestan, installing the extension adds a menu option in the 'Utilities' menu.

The screenshot shows the 'Étiquettes d'expédition' application window with the 'Destinataire' tab selected. The form contains the following fields and options:

- Destinataire** (selected), **Expéditeur**, **Imprimante**
- Nom prénom**: M. Sam RASSURE
- Radio buttons**: Perso, **Pro**, Fact, Livr
- Société**: ETOILE PRIMEURS
- Adresse 1**: 9 rue de l'Etoile
- Adresse 2**: (empty)
- CPostal**: 75017, **Ville**: PARIS 17
- Nb colis**: 5, **Commencer à**: 1, **Numéroter** (checked), **Poids**: 10, **QR Code** (checked)
- Ref expédition**: 20180912-7
- Transporteur**: TRSEXRESS
- Buttons**: Aperçu, Imprimer, Fermer

The first tab on the screen allows you to specify the recipient's address.

The screenshot shows the 'Étiquettes d'expédition' application window with the 'Expéditeur' tab selected. The form contains the following fields and options:

- Destinataire**, **Expéditeur** (selected), **Imprimante**
- Raison sociale**: SOFAR
- Adresse**: 88 avenue des ternes 75017 PARIS
- Mail / Tél**: contact@ics-informatique.com
- Logo**: <Sélectionner>, Image logo: E:\Z_...\2025-12-08_110551.png
- Nb colis**: 5, **Commencer à**: 1, **Numéroter** (checked), **Poids**: 10, **QR Code** (checked)
- Ref expédition**: 20180912-7
- Transporteur**: TRSEXRESS
- Buttons**: Aperçu, Imprimer, Fermer

The second tab allows you to specify the sender's details. You can choose whether or not to print a logo, which can be either your own or that of the carrier. You can specify a carrier name or leave it blank.

The third tab allows you to configure the default printer that will be used for labels. We developed this programme using a Brother QL-700 printer and DK-11202 self-adhesive rolls, size 100*62. However, as you will inevitably have a different printer and label format, we have included a few buttons on this screen that should allow you to configure it.

The following fields are available at the bottom of the screen: * **No. of parcels** ** **the number of parcels, which will determine the number of labels** * ****Start at** and **Number** allows you to display a parcel number on the label, in the form Parcel No. X/Y. For example, for 5 parcels, you will print labels 1/5, 2/5, etc., up to 5/5. The 'Start at' field allows you to start at 4/5, for example, if you have already printed the previous ones.

- It is possible to include the **weight** of the parcel on the label, as well as a **QR code**.
- You can also indicate a **shipping reference** and the name of the **carrier**.

The **Print** button will start printing as many labels as there are parcels.

🌸 You can put whatever you want in the Shipment reference and Carrier fields. For example, you can put the Incoterm code, the hazard class, etc. instead.
