

ETIQUEXPED: Shipping labels * *

 **Fix Me!** Migration in progress

Overview

This extension is designed to print shipping labels, the kind you stick on all the boxes you drop off at the carrier.

You can print labels like this:

The QR code (optional) contains the following information:

- EXPED: [the sender's details]
- DEST: [the recipient's details]
- Parcel number: [the parcel number, for example 7/12]
- [the carrier name]
- [the shipment reference number]

Use

Access: *Tools → Utilities → Shipping labels*

The screenshot shows the 'Shipping labels' application window with the 'Recipient' tab selected. The window has a title bar with standard OS controls. The header area contains the application logo and title. Below the header, there are three tabs: 'Recipient' (active), 'Sender', and 'Printer'. The main form area contains fields for 'Surname name' (M. Sam RASSURE), 'Company' (ETOILE PRIMEURS), 'Address 1' (9 rue de l'Etoile), 'Address 2' (empty), 'Postcode' (75017), and 'Town' (PARIS 17). There are radio buttons for 'Personal', 'Business' (selected), 'Billing', and 'Delivery'. At the bottom, there are fields for 'Nb package' (5), 'Start' (1), 'Number' (checked), 'Weight' (10), 'QR Code' (checked), 'Shipping ref' (20180912-7), and 'Carrier' (TRSEXRESS). There are also checkboxes for 'Overview' and buttons for 'Print' and 'Close'.

Shipping labels

Postcode 75017 Town PARIS 17

Nb package 5 Start 1 ☒ Number Weight 10 ☒ QR Code

Shipping ref 20180912-7

Carrier TRSEXRESS ☒ Overview Print Close

The first tab on the screen allows you to specify the recipient's address.

The screenshot shows the 'Shipping labels' application window with the 'Sender' tab selected. The window has a title bar with standard OS controls. The header area contains the application logo and title. Below the header, there are three tabs: 'Recipient', 'Sender' (active), and 'Printer'. The main form area contains fields for 'Company name' (SOFAR), 'Address' (88 avenue des ternes 75017 PARIS), 'Email / Phone' (contact@ics-informatique.com), and 'Logo' (<Select>). There is also a 'Logo image' field with a file path (E:\Z_...\2025-12-08_110551.png). At the bottom, there are fields for 'Nb package' (5), 'Start' (1), 'Number' (checked), 'Weight' (10), 'QR Code' (checked), 'Shipping ref' (20180912-7), and 'Carrier' (TRSEXRESS). There are also checkboxes for 'Overview' and buttons for 'Print' and 'Close'.

Carrier TRSEXRESS ☒ Overview Print Close

The second tab allows you to specify the sender's details. You can choose whether or not to print a logo, which can be either your own or that of the carrier. You can specify a carrier name or leave it blank.

The third tab allows you to configure the default printer that will be used for labels. We developed this programme using a Brother QL-700 printer and DK-11202 self-adhesive rolls, size 100*62. However, as you will inevitably have a different printer and label format, we have included a few buttons on this screen that should allow you to configure it.

The following fields are available at the bottom of the screen: * **No. of parcels** ** **the number of parcels, which will determine the number of labels** * ****Start at** and **Number** allows you to display a parcel number on the label, in the form Parcel No. X/Y. For example, for 5 parcels, you will print labels 1/5, 2/5, etc., up to 5/5. The 'Start at' field allows you to start at 4/5, for example, if you have already printed the previous ones.

- It is possible to include the **weight** of the parcel on the label, as well as a **QR code**.
- You can also indicate a **shipping reference** and the name of the **carrier**.

The **Print** button will start printing as many labels as there are parcels.

✿ You can put whatever you want in the Shipment reference and Carrier fields. For example, you can put the Incoterm code, the hazard class, etc. instead.
