

License extensions

 **Fix Me!** A1 proofreading not yet effective for this page. In the meantime, you can ask any questions on the [forum](#).

Gestan's functionalities can be extended with a wide range of free extensions.

However, for functions that are specific to a particular business, the use of certain extensions may be subject to licensing.

Unlike Gestan Enterprise licenses, extension licenses are allocated on a per-company basis, but “for life” (definitively, with no time limit or subscription).

Extensions are developed by ICS-Informatique, or any other company registered as [Partner-Developer](#).

Buy an extension license

When the extension's trial period (usually 30 days) has expired, a pop-up window suggests that you purchase the license.

If you respond positively, the next screen displays the billing address, established from the data in the general settings. These can be modified using the **Modify** button.

Please note that the license will be issued for the company name declared, so make sure it is valid.

Procéder à l'achat ✓ Annuler ✕

The 1 checkbox provides access to the **Proceed to purchase** button, which opens the payment method selection screen.

Depending on the payment method you choose, the corresponding screen allows you to enter the necessary information.

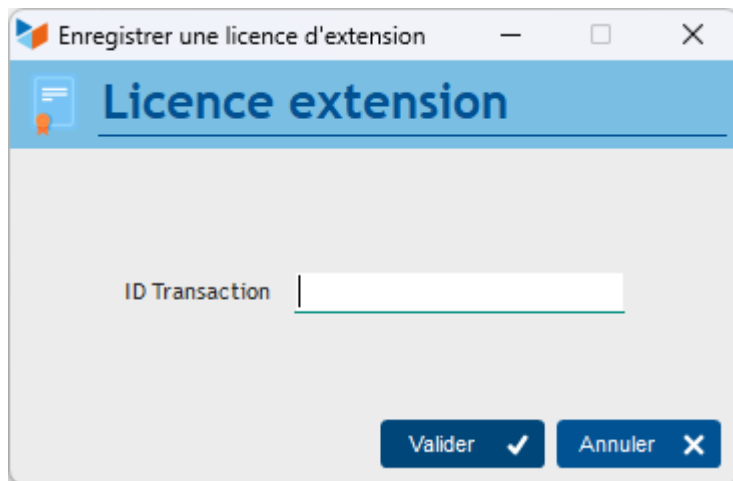

After payment, you'll receive an e-mail with a download link to the corresponding invoice, and the license key for the extension, specific to the company for which you purchased it.

Register an extension license

If you paid online, license registration is automatic.

If you paid by any other means, you need to register the extension license manually via menu ? → *Gestan Enterprise* → *Register extension*

On the screen, simply enter the ID number shown on your invoice.

The screenshot shows a window titled "Enregistrer une licence d'extension" (Register an extension license). The main heading is "Licence extension". Below the heading, there is a label "ID Transaction" followed by a text input field. At the bottom right, there are two buttons: "Valider" (Validate) with a checkmark icon and "Annuler" (Cancel) with an 'X' icon.
