

Contact addresses

 **Fix Me!** A1 proofreading not yet effective for this page. In the meantime, you can ask any questions on the [forum](#).

The contact card allows you to directly record a professional address or a personal address.

But it is possible to register other types of addresses via this screen.

Available address types

- Billing address: used to generate an invoice for the customer;
- Delivery address: used to generate a delivery note for the customer;
- "Parent 2" address: used by the EDUC extension in the event of a broken couple (the report cards generated for the attention of both parents)
- "Owner" address: address of the contact's property owner (used by certain property management programs)

 The context menu of the **Company name** area allows you to copy the professional address or the personal address of the contact.
