

## Consumption: simplified entry

 **Fix Me!** AI proofreading not yet effective for this page. In the meantime, you can ask any questions on the [forum](#).

Gestan comes with the easyConso program, which allows you to enter hourly consumption in a simplified way.

This program is intended to be installed on the computers of employees who do not have to know the company's internal information, but who must complete a time sheet every day.

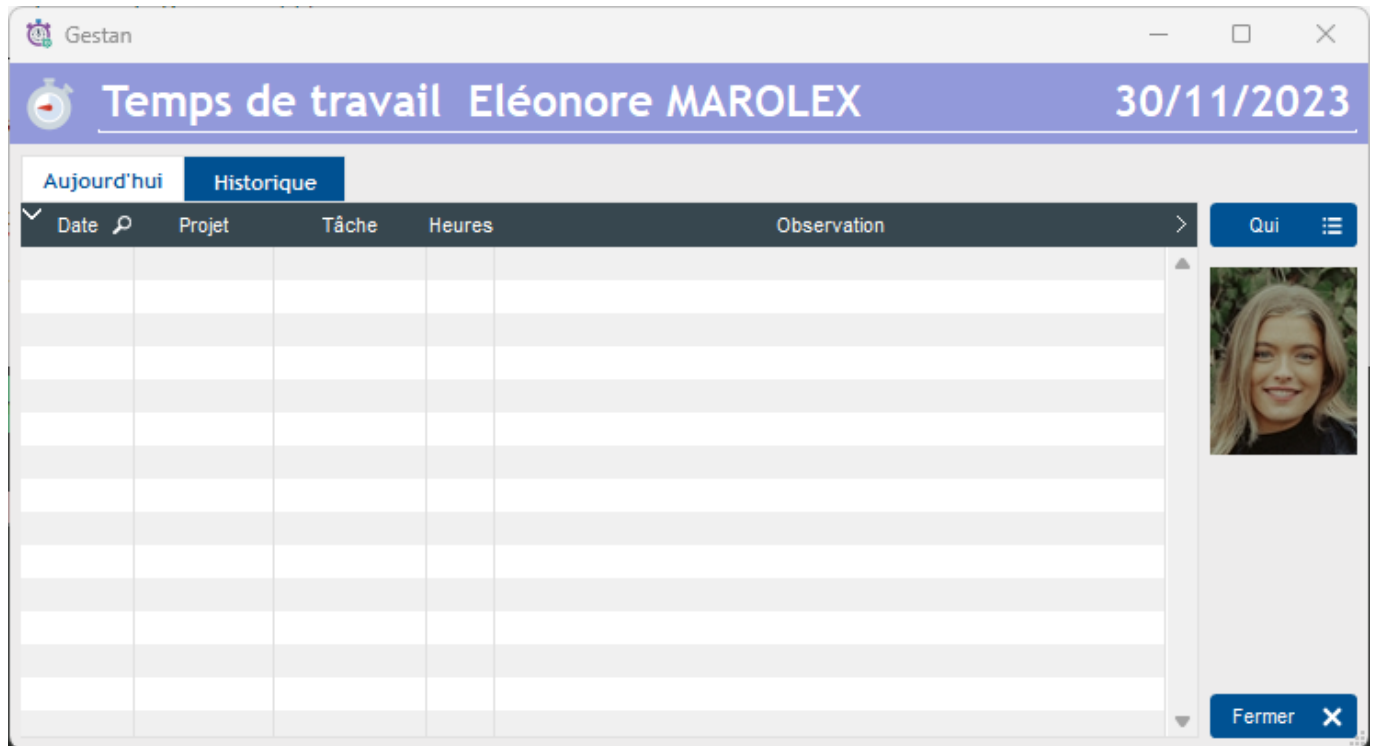

[illegible]

The **Today** tab displays today's consumption.

A click on the **Like yesterday** button populates the current consumption table with those of the day before.

The **Validate** button allows you to validate the recordings for the current day

The **Who** button allows you to select another user, if the rights of the connected user allow it.

The screenshot shows the Gestan application interface. At the top, there's a header with the user's name 'Eléonore MAROLEX' and the date '30/11/2023'. Below the header, there's a navigation bar with two tabs: 'Aujourd'hui' (Today) and 'Historique' (History). The 'Historique' tab is currently selected. Below the navigation bar, there's a table with columns: 'Date', 'Projet', 'Tâche', 'Heures', and 'Observation'. The table is empty. On the right side of the table, there's a user profile picture and a 'Fermer' (Close) button.

The **History** tab displays the consumption recorded for the user.

The date is colored orange for today's drinks, gray for those from the day before.
