

Generic links

 **Fix Me!** A1 proofreading not yet effective for this page. In the meantime, you can ask any questions on the [forum](#).

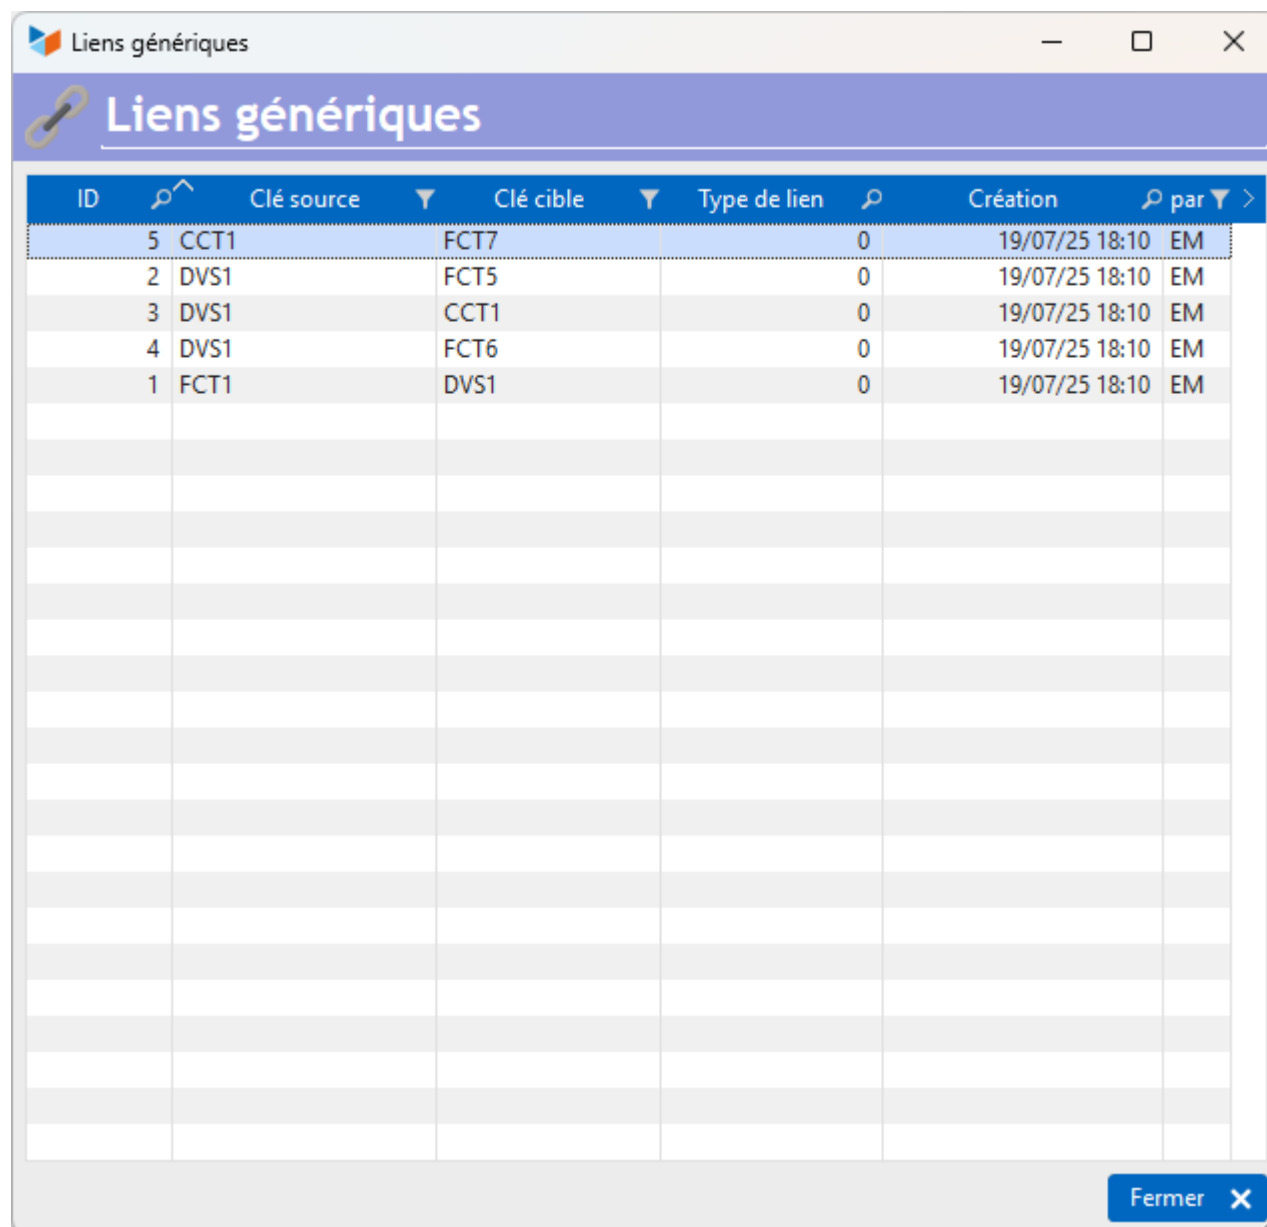

This screen is used infrequently, for control or administration purposes.

It is used to display existing links between two entities, mainly parts.

For example, it is through generic links that Gestan records that such and such a quote gave rise to such and such an invoice, or that such and such an invoice gave rise to such and such a BL.

Using the screen

****Access :** ****Tools** → **Administration** → **Repository** → **Generic links**

The screenshot shows a web application window titled "Liens génériques". Inside, there is a table with the following columns: ID, Clé source, Clé cible, Type de lien, Création, and par. The table contains five rows of data, all created on 19/07/25 at 18:10 by user EM.

ID	Clé source	Clé cible	Type de lien	Création	par
5	CCT1	FCT7	0	19/07/25 18:10	EM
2	DVS1	FCT5	0	19/07/25 18:10	EM
3	DVS1	CCT1	0	19/07/25 18:10	EM
4	DVS1	FCT6	0	19/07/25 18:10	EM
1	FCT1	DVS1	0	19/07/25 18:10	EM

At the bottom right of the window, there is a button labeled "Fermer" with a close icon.

In this example, we can see that invoice 1448 was generated from quote 130.
